Audit file

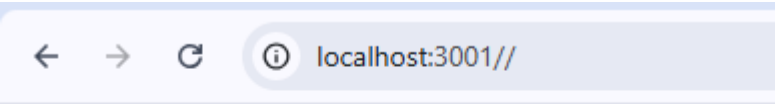

```
const { validateFeedback } = require('./modules/validator');
const { sendJson, readJson } = require('./modules/httpHelpers');

function createApp({ store = createStore(), events = new EventEmitter() } = {}) {
  // Demonstrates the lecture's EventEmitter: emit AFTER persistence succeeds.
  events.on('feedback:saved', record => {
    console.log(`Event: saved ${record.courseId}
      feedback (${record.rating}/5)`);
  });
//event to make file autdit log to save record or frrdback like in console

  events.on('feedback:saved', record => {
    const logMessage = `Feedback saved for course ${record.courseId} with rating ${record.rating}/5\n`;
    fs.appendFile('audit.log', logMessage)
      .then(() => {
        console.log('Audit log updated.');
      })
      .catch(err => {
        console.error('Error writing to audit log:', err);
      });
  });
```

First server file

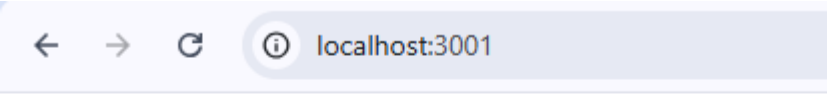

```
Hello! This is my first Node.js server.
```

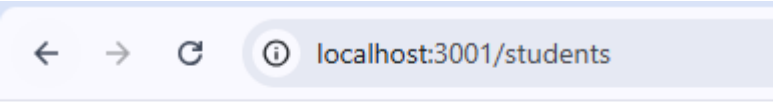

02-module-usage.js | math.js | feedback.ndjson | attendence.js | attendance.txt

Campus_Feedback_Node_Lab > examples > 04-first-server.js > server > http.createServer() callback

```
1   const http = require('node:http');
2   const server = http.createServer((req, res) => {
3     res.writeHead(200, {'Content-Type': 'text/plain; charset=utf-8'});
4     if(req.url === "/"){
5       res.end('Welcome');
6     }
7     else if(req.url === "/students"){
8     res.end('Student Records');
9     }
10  });
11  server.listen(3001, () => console.log('Visit http://localhost:3001'));
12
```

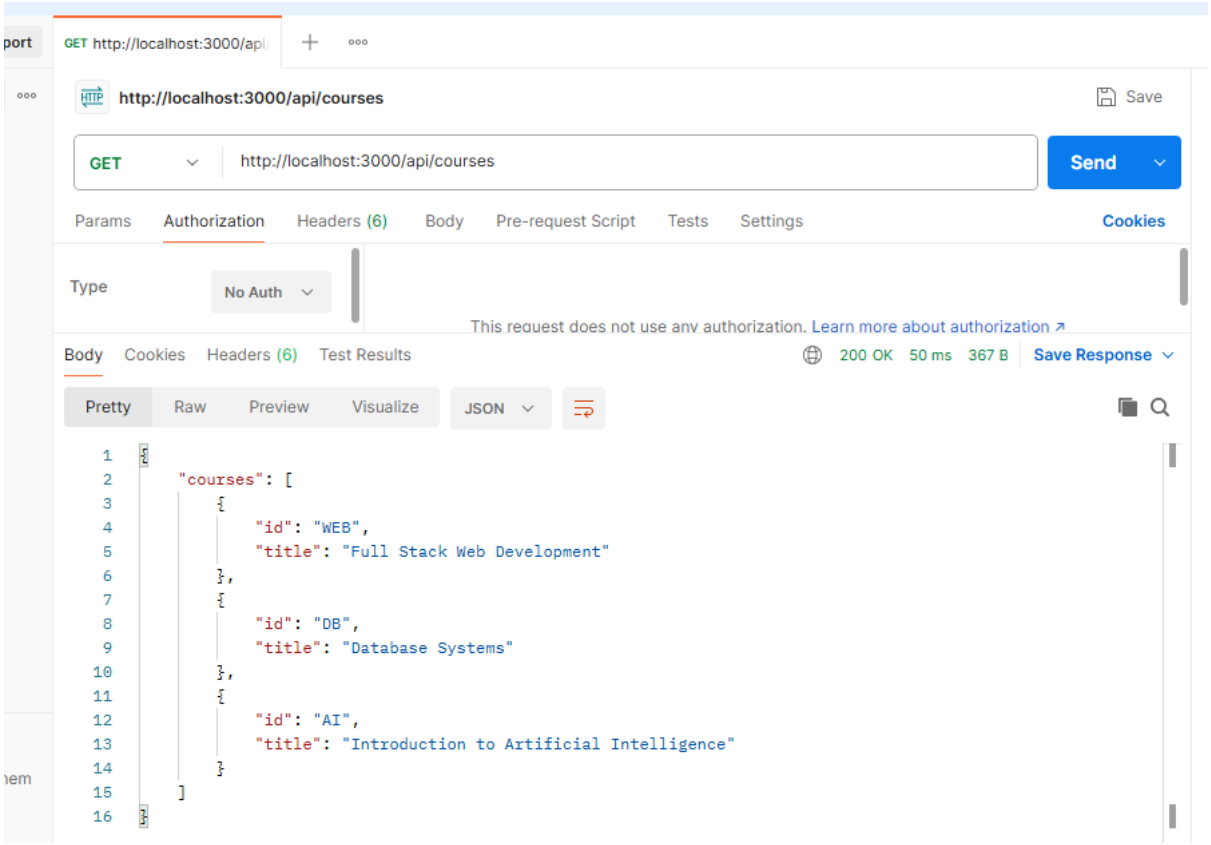

```
Welcome
```

```
Student Records
```
